

## **Cultural Anthropologist in Science and Technology Studies at San Diego State University**

The Department of Anthropology at San Diego State University invites applications for a tenure-track position at the level of assistant professor whose research explores the practices, institutions, and transformative effects of science and technology in shaping our world. We are especially interested in scholars who could complement our department's strengths in the thematic areas of health, human-environmental interactions, and social justice. Candidates must employ ethnographic research methods, and they must have a Ph.D. in Anthropology or a related social science by the time of appointment, a proven record of excellent publication in keeping with professional level, and potential for securing external research funding. Specialty interests may include, but are not limited to, health technologies and bio-medical practice; the intersection of science, technology, and environmental problems; risk, large technical systems, and sociotechnical innovation or catastrophe; and the politics of scientific knowledge production and technological development.

Applicants should have demonstrated experience in and/or commitment to teaching and working effectively with students from diverse backgrounds and members of underrepresented groups.

Interested candidates should apply via Interfolio at <https://apply.interfolio.com/64831>. Application review will begin on September 15, 2019, and the position will remain open until filled. Applications should include a cover letter, CV, and names and contact information for three professional references. For questions, please contact Dr. Matthew Lauer at [mlauer@sdsu.edu](mailto:mlauer@sdsu.edu). SDSU is a Title IX, equal opportunity employer.
